

## Dynamical Systems Innovation Lab, July 8-12, 2013

### **Thom Feroah**

Dr. Feroah joined the Center for International Health in October of 2008 to facilitate the development of new programs as well as to build the capacity of ongoing programs. Dr. Feroah has a special interest in establishing and developing an Institute within the Center that focuses on global health promotion and disease prevention. In addition, Dr. Feroah has a background in Outcomes Measurement and its application to health and disease prevention, especially in the use of photo-documentary in this area.

Dr. Feroah received his doctorate in Physiology from the Department of Physiology, Medical College of Wisconsin in 2001. Thereafter, he joined the Department of Pediatrics where his research focus was on the genomic basis of sleep, breathing and movement disorders, and also served as the Director of Research in the Children's Hospital of Wisconsin's Sleep Laboratory. Prior to his graduate work, Dr. Feroah worked in the field of Sleep Medicine as a technical director of clinical sleep facilities, performing research, as well as, teaching and training physicians and health professionals in Sleep Disordered Medicine throughout the world.
