

Josephine Roos

Myanmar Peace Support Initiative

Josefine is an international affairs practitioner, focusing currently on systemic conflict resolution and conflict sensitivity methodologies in Myanmar. Josefine's interest in system methodologies was sparked studying Dynamical Systems Theory at Columbia University, and subsequently she worked as a coordinator of the Dynamical Systems Theory Applied group, with the intent to move from theory to developing practical tools. She travelled to South Sudan with Stephen Gray, to use Dynamical Systems Theory to inform conflict assessment methodologies. For the past two years Josefine has been living in Myanmar, working as a consultant to the Myanmar Peace Support Initiative, as well as a range of international NGOs and the United Nations. She has conducted several systemic conflict assessments as well as trainings in conflict sensitivity. Since last years lab she is also involved in a Systemic Action Research project together with Danny Burns and Stephen Gray, working with enhancing community voices into the Myanmar Peace Process.
